Communiqué # ALL-001  
August 2015

### ATA 00 - General - Technical Publications Updates

#### IML Incremental Updates

Textron Aviation strives to bring you the latest and most vital maintenance library updates as quickly as possible. The FAA has approved Textron Aviation's launch for making revised publications and interim updates available faster via the web. Releasing this information as soon as it is available reduces the need for supplemental documents, such as Temporary Revisions, ICA Supplements and TMDAs (Technical Manual Deviation Approvals). These incremental releases are shown as point-releases to the most recently issued library.

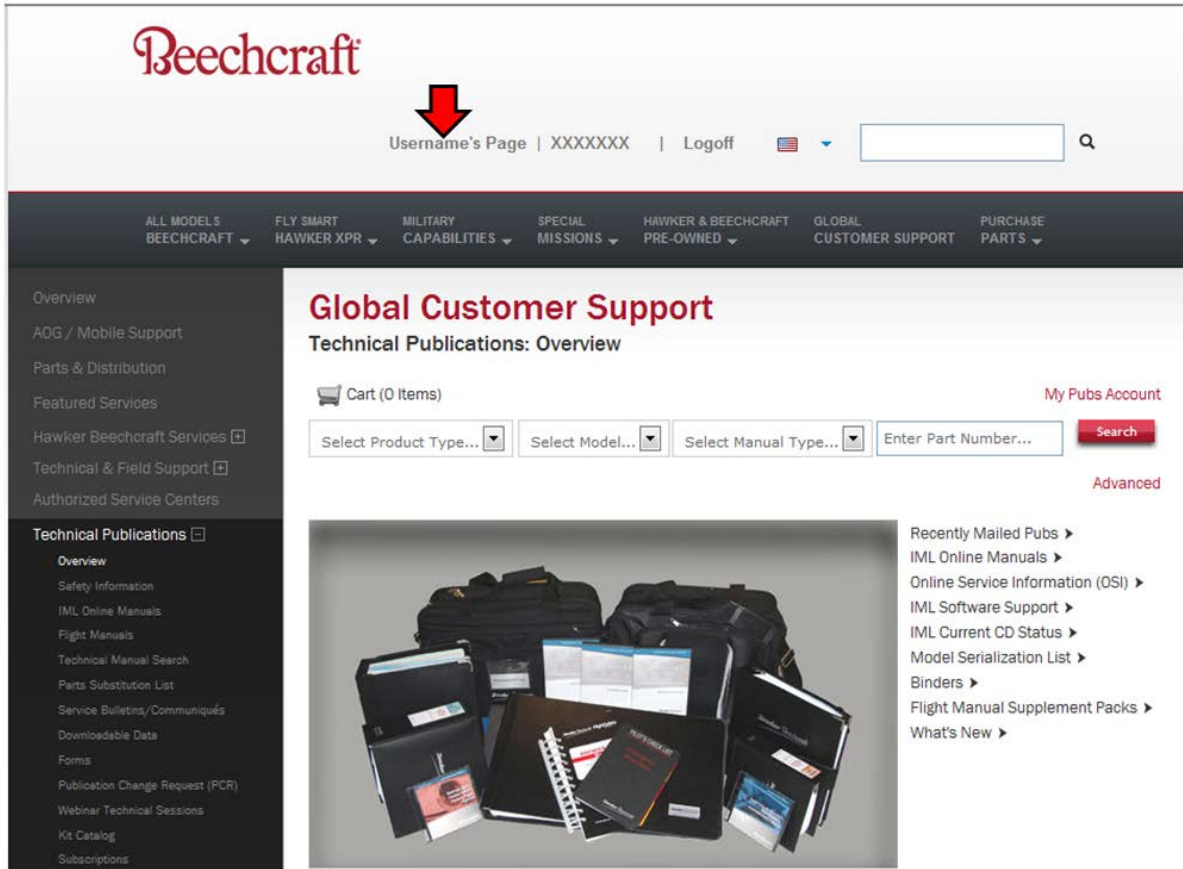

### Interactive Maintenance Library Status

Updated: April 2, 2015

As part of this initiative, we have implemented the incremental library updates for Interactive Maintenance Library (IML) subscribers at no additional charge. Rather than wait for the regularly scheduled revision release of a maintenance library, this “in between the revisions” update will ensure you have the latest information for your maintenance library.

No additional action is required on your part as IML Online Manuals will automatically include the updated manuals as soon as they are released online. An e-mail advising release of these updates will be sent to those who have signed up for the Service Information E-mail Notification. To sign up for the free e-mail notification, log in to <http://pubs.beechcraft.com> and click on your user name to access your profile.

While on the “My Tools” or “User Profile” tab, scroll down to add or remove models from your e-mail notification service.

## Username's Page

Service Information E-mail Notifications

#### Service Information E-mail Notification

Beechcraft Service Information E-mail Notification is a free service that provides email notification of Service Information mailings (Service Bulletins (SB's), Safety Communiqués (SC's) and Model Communiqués (MC's)). Service Information will be available for free in the Online Service Information (OSI) library for 90 days. A subscription to OSI will be required to view Service Information that is older than 90 days.

UPDATE

The IML DVD's, with the incorporated incremental updates, will release at the next regularly scheduled revision date. Subscribers to IML DVD's have automatic access to the online version. Paper and single CD subscribers will receive the incrementally updated manual after it is available online.

### Cesview Incremental Updates

Cessna users will be able to upgrade to Cesview 1.3.4 to activate the incremental update feature. As these are automatic updates, no additional action beyond upgrading to the latest Cesview version is required on your part.

An email advising release of these updates will be sent to those who have signed up for the Service Information Notification email. To sign up for the free email notification, simply register with [www.txtavsupport.com](http://www.txtavsupport.com).

### Submitting Publication Change Requests

In an effort to continuously improve our technical publications, Textron Aviation has extended our web-based capability for submitting change requests to include Cessna models. Hawker and Beechcraft publications will continue to use the existing Publications Change Request (PCR) submittal process to submit changes to publications.

- Hawker and Beechcraft - Access the PCR form on the Technical Publications website at <http://pubs.beechcraft.com>. Select Publications Change Request (PCR) under Technical Publications, complete the PCR form and submit your manual-specific change request. When filling out your request, you can check the box to receive email

updates regarding that Publications Change Request (PCR). A notification will be sent when the PCR is incorporated in the manual.

*IML Online Manual and OSI libraries include links to Technical Manual Deviation Approvals (TMDA) and Parts Verifications (PV) providing the most current HBC Instructions for Airworthiness. When researching Maintenance or Parts, research the TMDA to confirm no changes or additions to your area of interest are found in the applicable manual. Each TMDA will be eliminated as related manual revisions appear in the IML. PV listings are searchable in OSI and will remain unless revised or removed. **Warning**—PV listings are valid for aircraft S/Ns as of date issued. Use may require further research.*

## **ATA 00 - General - Online Illustrated Parts Catalogs**

We are also pleased to announce that all Beechcraft, Cessna and Hawker Illustrated Parts Catalogs (IPC) are now available online at no charge. The IPCs are in a pdf page-turner format and have been placed on <http://pubs.beechcraft.com> and <http://txtavsupport.com> for your convenience. The IPCs have been provided online to assist the user in researching part numbers for the aircraft. Registration is required for both websites.

To access Beechcraft and Hawker IPCs, go to <http://pubs.beechcraft.com> and click on Illustrated Parts Catalogs on the Tech Pubs Overview page.
